Education

B.Tech in Computer Science And Technology,
Anil Neerukonda Institute of Technology and Sciences
CGPA : 9.0

2023 Present

Technical Skills

Programming

- Python, Java
- SQL
- C++, C
- DSA, OOPs

Course Work

- Operating Systems
- DBMS
- Computer Networks

Web Development

- HTML
- CSS
- JavaScript
- ReactJs

Professional Experience

Machine Learning Intern, CognifyzTechnologies

04/2025

- Engaged in diverse aspects of machine learning.
- Exploring data preprocessing techniques, including feature scaling and selection, for optimizing model performance.

Projects

SMART INDIAN HACKATHON 2024

- Addressed a critical problem statement in Educational Technology Domain by providing interactive learning modules for the deaf and mute community.

Full Stack Art Gallery Web Application:

- Developed a comprehensive web application for showcasing and managing artwork. Implemented a user-friendly front-end for browsing and viewing art, and a robust back-end.

JavaScript Bookmark Landing Page Development:

- Developed a responsive and interactive landing page using JavaScript, HTML, and CSS to showcase a bookmarking application.

Mobile Application Development on Birthday Reminder App:

- Developed a mobile application to help users remember birthdays of their contacts, featuring notifications, contact integration, and easy date management.

Car Rental Service Database Management System:

- Designed and implemented a relational database management system to manage core operations of a car rental service, including vehicle inventory, customer information, rental agreements, and booking details.
